

internal::reset_color
< wchar_t >

```
graph LR; A["internal::reset_color< wchar_t >"] --> B["internal::fputs"]
```

A diagram showing a call from the function `internal::reset_color` to the function `internal::fputs`. The first box, containing `internal::reset_color` and `< wchar_t >`, is shaded gray. A blue arrow points from this box to a second, white box containing `internal::fputs`.

internal::fputs
