

```
WireCell::SigProc::  
SignalROI::get_above  
_threshold
```

```
graph LR; A["WireCell::SigProc::  
SignalROI::get_above  
_threshold"] --> B["internal::end"]
```

A diagram showing a call to the `SignalROI::get_above_threshold` method from the `WireCell::SigProc` namespace. The call is represented by a grey box on the left, and the result is shown in a white box on the right, labeled `internal::end`. A blue arrow points from the grey box to the white box.

```
internal::end
```
