

spdlog::logger::name

```
graph LR; A["spdlog::logger::default_err_handler_"] --> B["spdlog::logger::name"]
```

A diagram illustrating a pointer relationship between two variables. On the left is a gray rectangular box containing the text 'spdlog::logger::name'. On the right is a white rectangular box containing the text 'spdlog::logger::default_err_handler_'. A dark blue arrow points from the right box to the left box, indicating that the variable on the right points to the variable on the left.

spdlog::logger::default
_err_handler_
